

## Overviews wall mounted SU

As building or floor overviews flexible and individually designable and usable.

The wall-mounted overviews of **system sieben** are available in a wide range of different materials, dimensions and designs. This means that practically no situation is conceivable in which a costly custom design would be required. The surface design of the signs with lettering, characters, arrows, color and graphics can be individually adapted to the customer.

## Overviews wall mounted SU

The side profiles allow the insertion of individual surfaces.

The overview of a facility or company often presents itself in wall-mounted form within an entrance hall. In **system sieben**, slim, high signs look particularly elegant. The profiles are available up to a height of 2,000 mm as standard.

For the use of DIN A1 posters we offer a special format. (SU.. 8460)

### Example

For assembly reasons, the high elements are not pushed onto mounting rails, but are hung as a whole unit on dowelled hook screws and fastened in the manner of a keyhole suspension. The lettering is applied by foil text or digital printing. With an acrylic cover, lettering is also possible on the back. Item number SUE 20054 S with a curved surface made of polished stainless steel.
