

## LEMON+UNIT

The ALL-AROUND CARE-FREE STATION for compliance with the legal requirements for occupational health and safety and first aid.

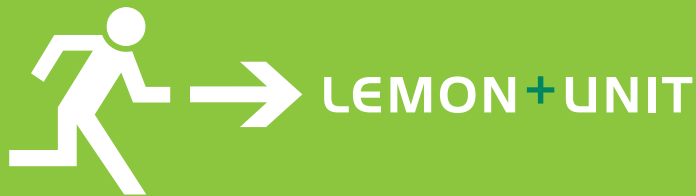

### A convincing concept for operational safety

Why go to the trouble of what is available in its entirety? The LEMON unit from meng is an unit that fulfils all legal requirements for occupational safety and first aid in companies and public institutions.

### The illuminated version

Visible from afar, the 3-sided luminous head panel signals its location. The intensive LED lights put the inscriptions, emergency texts and worktop in the right light in an energy-saving way. It has to be bright in an emergency!

## Basic version without lighting

The LEMON unit is delivered pre-assembled and ready for installation. The first aid cabinet is made of sheet steel. The low centre of gravity provides the unit with stability. It can also be anchored to the floor or wall to prevent it from tipping over.

In the basic version, the top panel without interior lighting is labelled with foil text. The rear panel is designed as a modular system. It is fitted with 9 interchangeable tiles in A4 format. One of these contains the sealed first aid kit in accordance with DIN 13 157C, which fulfils all legal requirements. The contents are guaranteed to last for many years and are positioned at an ergonomic height for easy access. Underneath is a tile with a plaster dispenser box with initial filling. Three further tiles are made of anti-reflective Plexiglas for inserting legal notices and safety regulations. Two further tiles are mirrors for finding foreign bodies in the eye. There is a secure box on one tile for inserting the emergency proofs. The remaining tile can be customised.

The hygienic worktop made of 6 mm toughened safety glass measures 367 x 697 mm. The most important first aid rules are clearly labelled. A side compartment provides space for the UVV manual and BG first aid book. The first aid cabinet underneath has plenty of storage space for the necessary dressing material, disinfectant, defibrillator, eye wash bottle, blood pressure monitor and other aids.

The standard colour is lemon green. We are happy to offer our first aid station to your individual colour requirements.
